

Overview:

Pakistan is prone to a number of hazards, in particular storms and flooding that occur frequently and induce significant humanitarian impact. This Inter-Agency Monsoon Contingency Plan acknowledges the lead role of the Government in all aspects of disaster management and the role of humanitarian and development partners in supporting national emergency preparedness and response structures and capacities. It supports the Government in ensuring an effective, timely and coordinated response to mitigate the risk and reduce the impact of natural disasters on communities, through a clear response coordination mechanism and strategy, and clearly defined roles and responsibilities.

For analysis and planning purposes, this plan focuses on four different scenarios for large-scale monsoon flood disasters. For reference purposes, protocols, coordination arrangements and information sharing approaches are included.

Estimated impact of Monsoon induced flooding in 2025

 **78** Million people
(Total population of Districts falling in Very High and High Priority)

 **33** Districts

 **21%** of the People in Need

 **114.7** Million

Number of District

Sector Costing

	FUNDING REQUIREMENTS (US\$)	ESTIMATED AFFECTED POPULATION	PEOPLE IN NEED	TARGET
Education	16.06M	16.1M	8.12M	0.26M
Food Security & Agriculture	31.25M	16.1M	8.12M	0.6M
Health	20.62M	16.1M	8.12M	1.3M
Nutrition	10.02M	16.1M	8.12M	0.35M
Protection	5.49M	16.1M	8.12M	1.13M
Shelter/NFI	9.58M	16.1M	8.12M	0.32M
WASH	17.54M	16.1M	8.12M	0.96M
Logistics	1.10M	16.1M	8.12M	1.10M
Coordination	3.0M	16.1M	8.12M	
Early Recovery	2M	16.1M	8.12M	0.25M

NFI = Non-Food Items, WASH = Water, Sanitation and Hygiene

Information Management

Resource Mapping: OCHA is leading the Assessment Working Group which is responsible for conducting the assessment in case of emergency on government demand.

Assessment tool: prepared a rapid need assessment tool.

5W data compilation: OCHA has an online data collection tool.

Situation overview: OCHA's IMO will produce daily situation overview snapshots.

Capacity building: OCHA regularly building the capacity of different stakeholders present in the field.

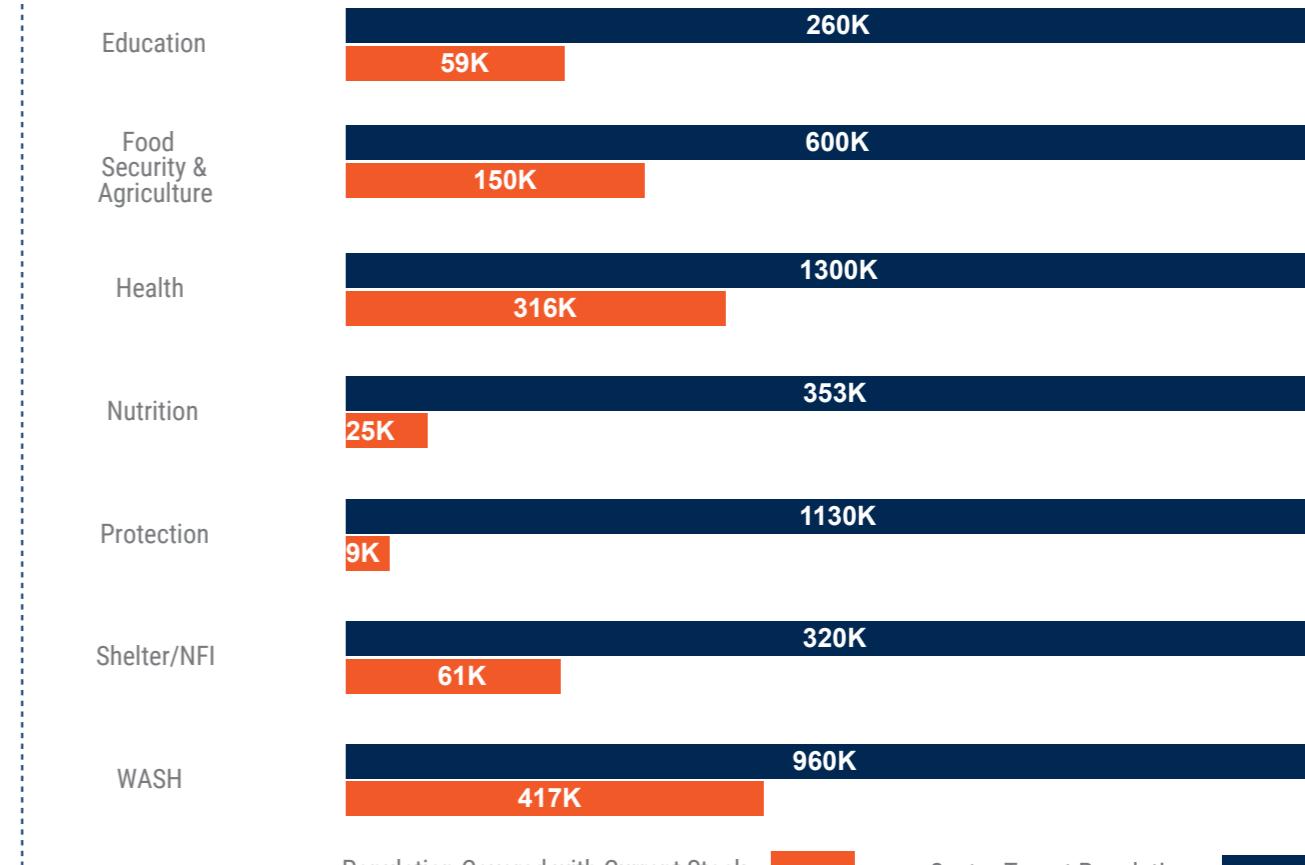

Assessment Registry: OCHA used to compile the assessment conducted by different stakeholders during or after an emergency.

Product publication: OCHA IMO are used to publish different products e.g 5W dashboard, people reached dashboard and Gap analysis dashboards etc.

Leading the IMWG for addressing ongoing activities and issues and for planning upcoming activities.

Common Operational Datasets (CODs) . Already in place and kept updated for any upcoming exercise.
